Humberto Emmanuel Rosales Martínez

Information Technology Engineer | Full-Stack Developer

Aguascalientes, Mexico | hemmanuelmtz777@gmail.com | 449 371 4565 | leviek.dev | github.com/Emmanuel-Mtz-777

Experience

Swopyn Business Software Solutions **Aguascalientes, Mexico**

Freelance Developer Jan 2025 – Feb 2026

- Built a mobile application from scratch with React Native (authentication, navigation, REST API consumption, state management, and WebSockets for real-time features).
- Developed new features across 2 web and mobile applications with React and React Native, integrating a multi-module enterprise REST API for data synchronization and backend service communication.
- Designed reusable components and custom hooks to improve maintainability and accelerate the development of new features.
- Implemented endpoints and business logic on the backend with Node.js and Python, including authentication and server-side data validation for the application's operation.
- Deployed and ran services using Docker, and collaborated with the team using Git and agile methodologies for continuous delivery of features.
- Participated in the analysis and implementation of solutions for the company's internal processes.

IoT Developer **Aguascalientes, Mexico**

Nov 2023 – Dec 2024

- Developed an end-to-end IoT solution, integrating hardware and software for device automation.
- Designed a modular architecture that facilitated system maintenance and the scalability of new features.
- Configured Linux services for device communication and data processing.
- Implemented device-to-device communication using protocols such as MQTT and Wi-Fi, integrating sensors and actuators for real-time monitoring.
- Developed the automation interface with JavaScript, including web and mobile views, and added a database for action management and device control.

New Business Supervisor **Aguascalientes, Mexico**

Exhibidora Mexicana Cinépolis S.A. de C.V Oct 2021 – Mar 2023

- Supervised daily operations and coordinated staff to ensure compliance with shift objectives.
- Managed cash handling, cash register audits, and shift opening/closing, ensuring consistency in reconciliations.
- Assisted customers and resolved issues and complaints, providing follow-up until resolution.
- Managed inventory control and replenishment, as well as supplier orders and operational documentation (invoices, notes, vouchers).
- Prepared operational reports and monitored performance indicators to support decision-making.
- Managed operational incidents, ensuring compliance with procedures and quality standards.
- Trained, assigned tasks to, and followed up on the performance of new team members.

Projects

- **Products API** — RESTful API with Spring Boot and MySQL: layered architecture, JPA, DTOs, validations, centralized error handling, pagination, dynamic filtering, endpoint documentation with Scalar (OpenAPI), and Docker deployment.
- **Meet2go** — Cross-platform mobile application (iOS/Android) with React Native, Node.js, and Supabase: authentication, data synchronization, event management, and real-time chat via WebSockets.
- **C-Ita** — Backend API with Node.js, Express, and MySQL for an academic social network: authentication, data management, and communication between the mobile app and external services.
- **Spotify Insights with Elasticsearch** — Data analysis environment with Elasticsearch, Kibana, Docker, and Jupyter Notebooks for exploring and visualizing Spotify datasets.

Education

Instituto Tecnológico de Aguascalientes **Aguascalientes, Mexico**

B.Eng. in Information and Communication Technologies Graduated March 2026

Certifications

- CCNA: Enterprise Networking, Security, and Automation.
- CCNA: Switching, Routing and Wireless Essentials.
- CCNA: Introduction to Networks.
- Linux Unhatched — Cisco & NDG Linux Essentials.
- Introduction to Data Science.
- Network Security.

Technical Skills

- **Frontend:** JavaScript, TypeScript, HTML5, CSS3, React, React Native, Vue.js.
- **Backend:** Spring Boot, Node.js, Express, Python, Laravel, REST APIs.
- **Operating Systems and Infrastructure:** Docker, Docker Compose, Linux.
- **Databases:** MySQL, MariaDB, SQLite, SQL Server.
- **Tools:** Git, GitHub, Postman, Swagger/OpenAPI.

Professional Competencies

- Technical problem-solving and requirements analysis, prioritizing tasks under pressure and in the face of changing requirements.
- Effective communication and collaborative work in multidisciplinary teams, including frontend-backend coordination.
- Adaptability to new technologies, tools, and development environments.
- Autonomous task management and goal achievement using agile methodologies.

Languages

- Spanish — Native.
- English — B1.
